Signature: _____

Field Inspection By: _____ Date: _____ Check # _____

Approved: _____ Denied: _____ Permit # _____

CRITERIA FOR ISSUANCE OF ANNUAL ON-STREET PARKING PERMIT AS REQUIRED BY SECTION 10.24.090 OF THE ROLLING HILLS ESTATES MUNICIPAL CODE.

In determining hardship for an annual permit, the City Manager shall be guided by the number of garage spaces available to the applicant, other alternative off-street parking available, and the effect on traffic flow and safety. A hardship shall not be considered in the case of where a garage, or portions thereof, has been converted for purposes other than that of a garage or if such garage is being used for other purposes (such as for storage of items) other than for that of a passenger vehicle(s). In the event that a resident has any trailers or any motorcycle(s) or other type of mobile equipment, such as an all-terrain-vehicle (ATV), whether registered by the DMV or not, parked in a garage, all such vehicles together shall only qualify to occupy one parking space maximum (10' by 20') in place of where a passenger vehicle would park, solely for the purposes of evaluating whether or not an on-street parking permit should be granted. In no case shall a single address be allowed more than two on-street parking permits. The adequacy of off-street parking for number of vehicles at each address shall be determined as follows:

1. In garages, one vehicle shall be parked within each area at least 10' wide and 20' deep;
2. In straight driveways, one vehicle shall be parked within each area at least 10' wide and 22' deep. One additional vehicle shall be parked in the driveway if the depth of the driveway exceeds 43';
3. In curved driveways, one vehicle shall be parked within each area at least 10' wide and 22' deep, measured along the radius at the center of the driveway. If the driveway is at least 20' wide and 44' deep measured along the outside of the radius, one additional car shall be parked for each additional area at least 10' wide and 22' deep;
4. In circular driveways, one vehicle shall be parked within each area at least 10' wide and 22' deep;
5. In combination driveways, the standards established for all other driveway types shall apply in combination;
6. In driveways with steep slopes (greater than 15%), one vehicle shall be parked within each area at least 10' wide and 25' deep;
7. The availability of on-street parking is adequate to insure that traffic flow on the street in the vicinity will not be impaired or sight distances obstructed, as determined by the City's traffic engineer; and,
8. The vehicle for which the permit is sought is a passenger vehicle. This excludes campers, motorhomes, trailers of any kind; and trucks, vans or Sport Utility Vehicles (SUVs) in excess of 7' wide, 6.5' high and 20' long, inclusive of any projecting racks and/or vehicle appurtenances. No commercial advertising shall be allowed on a vehicle with a valid on-street parking permit;
